LOT 524 - Case 1030 Tractor

Location Bob's Lot

Description

Case 1030 Tractor

This is a nice looking tractor. It runs, moves, and stops. This tractor has engine noise. The noise is coming from the top end of the motor. The front most cylinder isn't firing and fuel is dripping out of the exhaust port. Likely has a stuck valve or something going on with the valvetrain.

This tractor has one mismatch wheel on the back in order to get it moving but the original wheel is available.

This tractor deserves a second chance. The sheet metal is in overall good shape.

Quantity: 1
