

Sale Name: Annual Drivers, Project Cars & Trucks Auction

LOT 25 - 1978 Ford 3/4 4x4 w/ 460

Title Status Clear title

Description

1978 Ford F-250 4x4, this was put together from a couple different trucks. Frame & underneath bed was sand blasted and painted with SPI epoxy, it was a multi coat project. Original fuel tanks were hot water washed and also shot with epoxy. New or cleaned up used sending units. After that we installed a new 4 inch Rancho suspension and shocks, new brakes, booster & custom length brake lines. Original body was damaged beyond repair so we used a body from a 1977 two wheel drive. We patched in good metal on the pickup bed. The cab floor was exceptionally clean, we put a new carpet in it. Engine, transmission & Transfer case came from a donor truck. New radiator, new red top steering box, probably some other new things we forgot about. This truck is proof that with a bit of time and determination good things can happen. It's ready for a new owner & there is plenty of misc things on it left to do to make it you're own. Fair warning: You will be asked if you want to sell it every single time you take it out. We tossed in a couple in progress pics. **Title:** Clear title

Tires: New 35 x 12.50 x 17 **Bed size:** 8 ft.

Quantity: 1
