LOT 70 - Unused TMG Industria

Description

Unused TMG Industrial 10,000 starting watts 8000 W continuous new generator, in the box, dual fuel, gas or propane. The TMG Industrial 10000-Watt Dual Fuel Generator (gasoline and LPG) is ideal for job sites, remote locations, cabins and more. This highly versatile generator can switch on the fly between gas and LPG. One-touch electric start makes this generator easy to start in the dark during a power outage, and a 25-litre fuel tank provides a run time of 8.5 hours at 50% load with a quiet operating volume of 78 dBA. A powerful 459cc OHV engine connected to an efficient, high-performance alternator allows this generator to power refrigerators, pumps, air conditioners, lights, TV, and more all the same time. The GFCI-protected outlets, weather-resistant outlet covers and solid 1-1/4" heavy-duty frame make this generator safe to use and durable enough to handle job site conditions. Added bonuses are the never-flat solid wheels and 12V DC plug with a USB adapter.

Quantity: 1
