

**Sale Name:** 23rd Spring Fever Machinery Auction

**LOT 202 - 1954 Farmall Super W**

### Description

1954 Farmall Super W9, nice looking tractor, runs on gas & diesel, this tractor is in good repair, the seller states it had all new valves, rings & head machined in Billings when it was rebuilt 13 years ago. The paint is decent, a good solid tractor. No surprises. { We pulled the battery cable just for preventative measures, normally it just stays on}

**Please Note:** Please...unless you know how to start this, just leave it alone when previewing it. It has a specific way to start & stop the engine. The seller has always followed those rituals with great success. Thank you.

**Quantity:** 1
