1998 Ford Expedition

This was driven to our sale site from about 60 miles away. Previous owner states it had new coil packs and plugs last year.

5.4L V8, automatic, 4x4, has third row seating.
Odometer shows: 254,517

Exhaust is a little loud. We noticed some oil seepage and a little antifreeze drip up front. Antifreeze appeared to be coming from a hose. Nothing is pouring out. The drivers window has issues rolling up and down.
